Forward-Looking Statement Cautions:

This press release contains certain "forward-looking statements" within the meaning of Canadian securities legislation, relating to, among other things the intended use of the proceeds of the Offering, the Company's intention to proceed with the execution of its exploration and development plans for its Cerro Caliche Project, including the development of a heap leach pilot operation, and the forecast release of an updated resources estimate. Although the Company believes that such statements are reasonable based on current circumstances, it can give no assurance that such expectations will prove to be correct. Forward-looking statements are statements that are not historical facts; they are generally, but not always, identified by the words "expects," "plans," "anticipates," "believes," "intends," "estimates," "projects," "aims," "potential," "goal," "objective," "prospective," and similar expressions, or that events or conditions "will," "would," "may," "can," "could" or "should" occur, or are those statements, which, by their nature, refer to future events. The Company cautions that forward-looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made and they involve a number of risks and uncertainties, including the risks that the Company will not be able to secure sufficient future financing necessary to fund all of its proposed exploration and development of its Cerro Caliche Project, or to fund its other project exploration and development business; future exploration results will be unfavourable and will not support the proposed plan to build a heap leach pilot operation or justify further exploration efforts; equipment failures, accidents, or external problems (e.g. civil unrest, public health emergencies) may materially increase the Company's business expenses or delay (or prevent altogether) the execution of the Company's business plans; and unanticipated changes in the legal, regulatory and permitting requirements for the Company's mineral exploration programs and development plans for its projects, at present, all of which are located in Mexico, may prevent the Company from carrying out some or all of its business plans.

There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law or the policies of the TSX Venture Exchange.
