

WHY SONORO GOLD IS DISTINCTIVE IN THE JUNIOR GOLD MINING SECTOR

ALL THE ESSENTIAL COMPONENTS TO BE A SUCCESSFUL GOLD PRODUCER

1. TEAM

A diversified, proven and success-driven management and technical team with extensive expertise in the discovery, delineation and development of mineral deposits including 12 gold mining operations.

2. PROJECT

The flagship Cerro Caliche gold project is strategically located in Sonora State, Mexico, surrounded by several gold-silver mining operations, including Bear Creek Mining's Mercedes mine and Agnico Eagle's advanced Santa Gertrudis project.

Exploration at Cerro Caliche includes 498 drill holes over 55,300 meters, confirming a broadly mineralized low-sulphidation epithermal vein structure and multiple northwest-trending gold mineralized zones along trend and near surface.

With only 30% of the property's identified mineralized zones drilled and assayed to date, the Company filed an updated Mineral Resource Estimate (MRE) in March 2023. In August 2023, the Company announced positive results from a new Preliminary Economic Assessment (PEA), demonstrating the potential viability for a 9-year open pit, heap leach mining operation.

3. COMPANY

Insiders hold over 24.5% of 166.07 million Issued and Outstanding shares and the Company boasts a strong retail shareholder base across Canada, USA, Germany and Switzerland.

4. BUSINESS PLAN

The Company maintains a clear business plan and execution strategy to bring Cerro Caliche into production to finance ongoing drilling campaigns designed to materially expand the project's oxide gold resource.

5. FINANCING

Management continues to successfully secure financing including multiple over-subscribed non-brokered private placements totaling CAD \$20 million since August 2020.

CERRO CALICHE GOLD PROJECT

The 1,400-hectare Cerro Caliche gold project is approximately three hours south of Tucson, Arizona and three hours north of Sonora's state capital, Hermosillo. Sonora is one of Mexico's leading mining states and an important producer of gold, silver, copper, iron and non-metallic minerals. High-skilled workforce, first-class infrastructure and pro-mining climate have positioned Sonora as a premier mining destination.

In May 2022, the Company filed its Environmental Impact Statement (Manifestacion de Impacto Ambiental or MIA) permit application for the development of an open pit, heap leach mining operation. The Company plans to bring Cerro Caliche into production to finance resource expansion with minimal dilution to shareholders.

Development of the proposed mining operation will proceed alongside upcoming drilling campaigns designed to materially expand the project's oxide gold mineralization and potentially enhance the overall economics of the project.
